ABOUT THE BRAND

bev. is a modern hydration brand built around a simple idea: make the functional stuff easier, more enjoyable and more human. With flavour enhancers and electrolytes that turn everyday water into something you actually want to drink, bev. sits between wellness and everyday enjoyment.

It is functional without feeling clinical.
Playful without feeling childish.
Designed without feeling overly designed.
Because feeling good doesn't have to be complicated.

BRAND STORY

We all know we should drink more water.
Yet somehow, a simple glass of water is one of the easiest things to forget.

The problem isn't that people don't understand hydration. It's that hydration has become another task on an already endless list of things.
bev. exists to change that. What started with a simple functional need becomes something more enjoyable.

bev. brings together the things that usually live in separate worlds: function and fun, wellness and personality, structure and spontaneity.
Because taking care of yourself shouldn't always feel serious.

BRAND ASSETS

This section highlights the core identifiers of the brand, including the logo, brand icon, and supporting graphic elements. These assets form the visual signature of the brand and ensure strong recall and recognition.

PRIMARY LOGO

Identity that feels both structured and approachable.

The three coloured forms give the logo its immediate energy and recognisability, while the rounded typography adds a sense of fun, friendliness and ease. Together, they capture the core of bev.: functional at its heart, but never boring.

The primary logo should be used as the default brand signature across key brand touchpoints, ensuring consistency and strong recognition.

SECONDARY LOGO

The secondary logo system gives bev. more flexibility across different brand touchpoints while retaining the core identity.

It includes two expressions: the standalone bev. wordmark within a circular container, and the three-part modular symbol used independently as a recognisable brand icon.

The circular wordmark works well for smaller, contained applications such as social avatars, stickers and merchandise, while the standalone symbol can act as a distinctive graphic device across packaging, patterns and communication.

DO: Water is inherently sensory - seeing it can instantly create a feeling of freshness and thirst.

The key is restraint. Water should enhance the product and create desire, not overpower the frame.

Make it feel fresh. Make it feel refreshing. Make people thirsty.
